

Leaders in Separation Technology

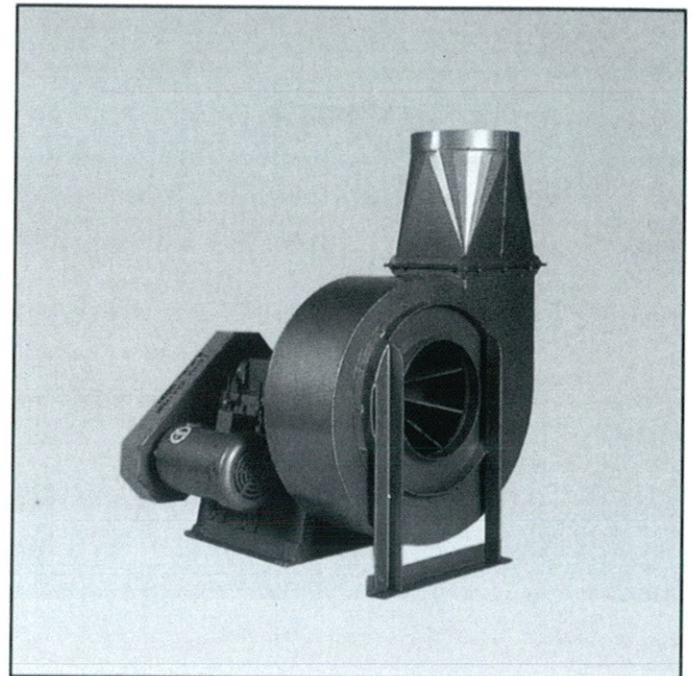

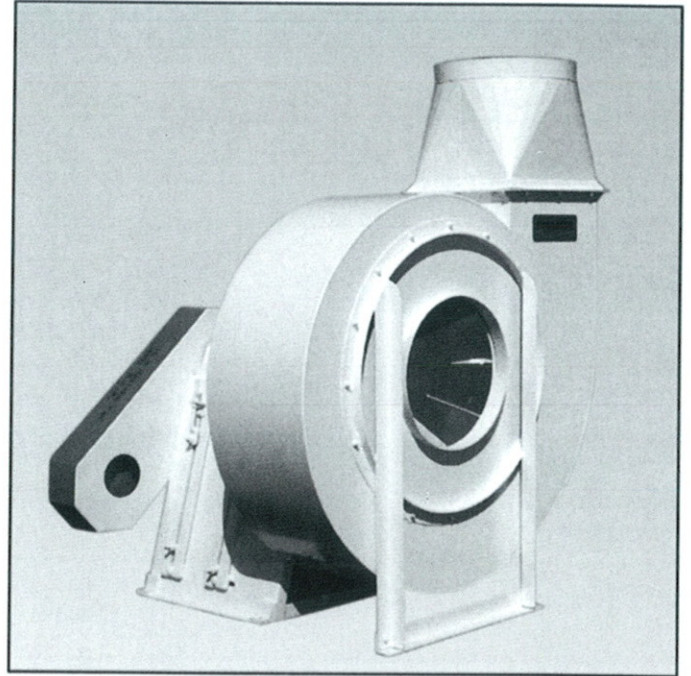

Industrial Fans

Forsberg, Inc., one of the nation's leaders in the manufacturing of dry granular separation machinery, has long recognized the importance of air systems as it applies to their own line of vacuum machinery. Forsberg has been manufacturing their own industrial fan line for over 60 years in order to meet the performance requirements not found in "standard" industrial fans.

These fans are available in either clockwise or counterclockwise rotation.

Contact Forsberg for your free product evaluation in our testing facility to ensure complete customer satisfaction prior to your purchase.
