Hi-Cap | Separator

Hi-Cap separator features:

Operating control

- ▶ Simple and highly effective adjustments
- ▶ Intuitive manual controls
- ▶ Adjustable dual-axis tilt for enhanced quality and capacity
- ▶ Multi-fan system with independent fan dampening control
- ▶ Gauges for side tile, end raise, feed flow, air flow pressure, and eccentric speed*

Ease of use

- ▶ All adjustments can be made safely while in operation
- ▶ Separate air system for operation is not required
- ▶ Dust control with an optional full or partial dust hood with exhaust air adjustments
- ▶ Variable Frequency Drive control for easy adjustments of deck eccentric speed
- ▶ High side material bypass gates for process optimization

Reliability

- ▶ Nearly a century of experience in gravity table engineering and manufacturing
- ▶ Low maintenance for reduced downtime
- ▶ Post-purchase training and machine service packages available
- ▶ Spare parts available to order

Performance

- ▶ Separates product efficiently
- ▶ Rectangular deck design allows for maximum product separation time
- ▶ Wide range of deck eccentric speed to optimize separation performance
- ▶ Efficient air zone control from initial stratification through final discharge
- ▶ Decks are designed and built to your product specifications with custom overcover and undercover

Configurations

- ▶ UL/CUL electrical cabinets are available for efficient machine installation and wiring
- ▶ Square-to-round discharge hopper transition for gentle product handling and hookups and easier hookups*
- ▶ Aspirating feeder removes fine particles and keeps air clean*
- ▶ Counterbalanced for smooth operation*, durable coated overcover material, machine setting indicators*, VFD, Accu-Flo feed gate, discharge options, full or partial dust hood, stainless steel available for food grade products, and other custom configurations available

*Standard on Master Series.

Capacities are based on the following assumptions:

1. Machine feed rate
2. Light fraction to be removed is assumed to be 5% or less of total incoming products
3. Vary depending upon the bulk density of the product
4. These capacities are estimates only and products can be tested and confirmed at the Oliver laboratory
5. Capacities may change based on particle size and range
