

Leaders in Separation Technology

Vacuum Gravity Separator

The Forsberg Vacuum Gravity Separator has a reputation of being the most accurate and efficient dust-free separator available! This is made possible due to the absolute control of three essential elements:

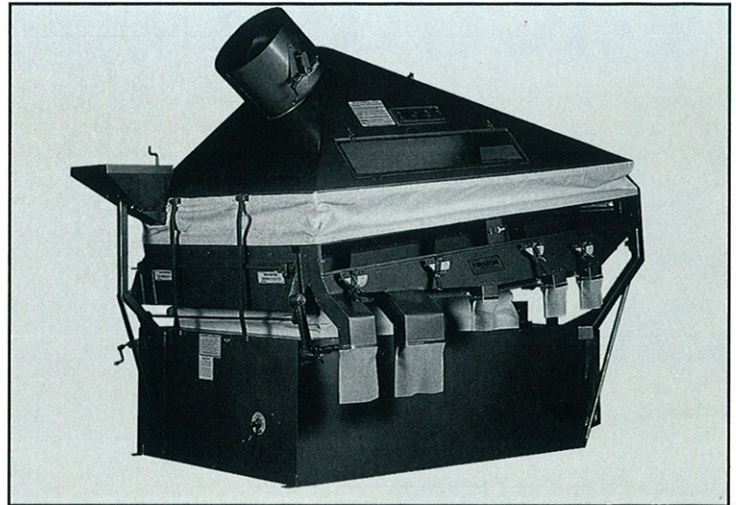

- Air Flow
- Speed of vibration
- Deck differential action

The vacuum gravity air system assures a complete and accurate product density classification from the very lightest to the very heaviest.

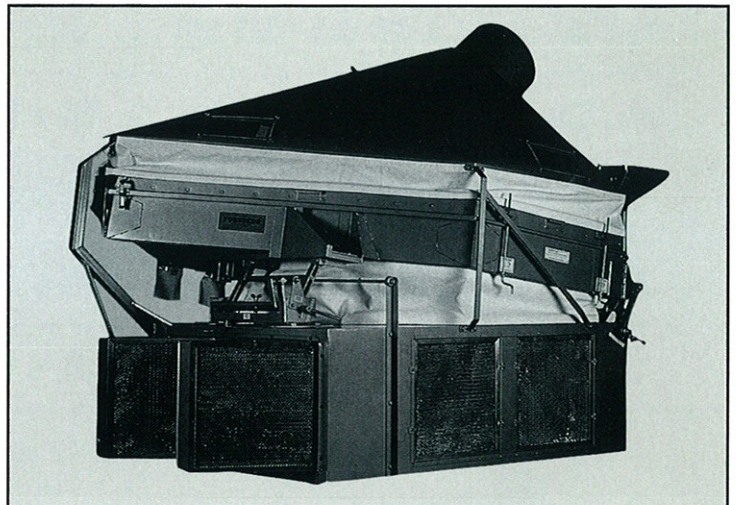

The easy-to-adjust divider blades provide unlimited control of the discharged product.

Forsberg Gravity Separators are constructed of high grade steel which provides years of trouble-free performance. All the Forsberg Gravity Separators include unique, counterbalanced, eccentric drive for quiet, vibration-free operation.

Numerous options and modifications are available to meet the stringent needs and demands of each customer in all industries.
