

Leaders in Separation Technology

Inertia

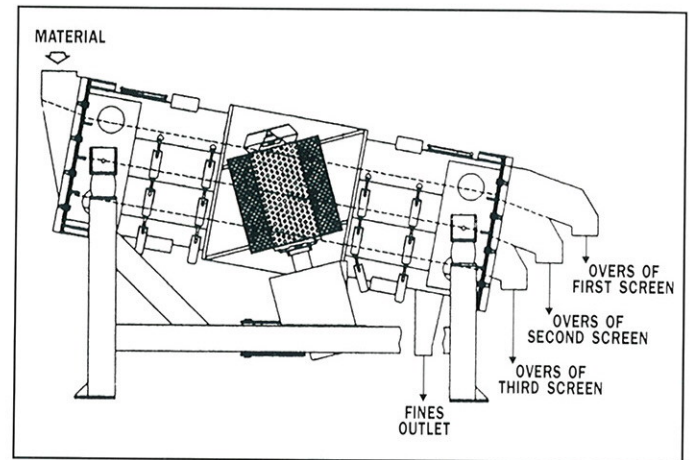

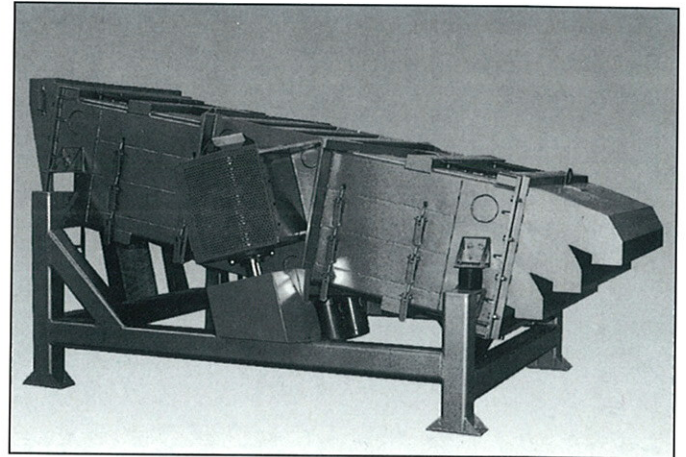

Screen Separators

With Multiple Screen Features:

The Forsberg Inertia Screen Separators are designed to provide maximum removal of oversized and fine material with the reciprocating motion. This type of screening action ensures consistent product contact with the screening surface.

- Self-balancing, parallel shaft inertia drive
- Cushion mount suspension system
- Straight line reciprocating motion for maximum efficiency
- Self-cleaning and quick-change screens
- Available with stainless steel construction
- Low maintenance

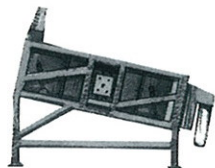

Contact Forsberg for your free product evaluation in our testing facility to ensure complete customer satisfaction prior to purchase.
